Admiral Enquist Will Not Be Allowed to Repair Warships

TRAIN GIVEN INSTRUCTIONS

Decision of President Announced After Conference With Morton and Taft.

(By Associated Press.)
WASHINGTON, June 5.-Admiral Enquist will not be allowed to repair his ships at Manila. This government has decided that as the injuries to the vessels were not caused either by the sea or by storm, it will be obliged to refuse permission for the vessels to be repaired there To-day Secretary Taft cabled the follow ing instructions to Governor Wright & Manila regarding the ships:

"Time cannot be given for the repair of the injuries received in battle. Therefore the vessels cannot be repaired unless interned until the end of

hostilities."
Admiral Train has been instructed accordingly. It was stated by Secretary Tark that if the Russian vessels agreed to leave Manila in their present condition, they were welcome to do so, but, as it did not appear that they suffered from any damage caused by the sea or storm, this government was obliged to take the position above outlined.

In Accordance With Policy.

The President's decision regarding sposition of the Russian vessels at The President's decision regarding the disposition of the Russian vessels at Manila, that they shall intern or put to sea, is, it is said here, in accordance with the best naval opinion, and is in pursuit of the polley of strict neutrality followed by the Washington government from the beginning of the war. It is specifically declared that there is no intention to show the slightest favoritism in the matter, and everything possible will be done for the comfort of the wounded Russians. The ships when interned will, of course, be allowed to be put in habitable condition, and such repairs as are necessary to keep them affect will be allowed.

The decision of the President was announced after conferences with Secretaries Morton and Taft. Rear-Admiral Converse, chief of the Bureau of Navigation, personally took charge of the preparation of instructions to Rear-Admiral Train, who is to be in supremecharge of the details of internment, this being the practice followed when the Lena put into port at San Francisco and was interned under the alrection of the commandant of Mare Island navy yard.

s interned under the direction of the ornandant of Mare Island navy yard. Instructions to Admiral Train, when poleted, will be approved by the Sec-ary and cabled to Manila in the ex-tation that Admiral Enquist will

retary and eabled to Manila in the expectation that Admiral Enquist will forthwith decide to intern in view of the bad condition of his vessels.

The Japaness minister here having formally inquired of the Department of State what action the United States sovernment intends to take respecting the Russian vessels in Manila Bay, acting Secretary Loomis to-day responded that these vessels would be interned provided they did not leave the harbor at once. This exchange has taken place in order formally to establish the responsability of the United States government for the detention of the vessels in Manila harbor until the end of hostilities.

Warships Will Be Interned, St. Petersburg Thinks. (By Associated Press.)

ST. PETERSBURG, June 5.—7-23 P. M.—Both the foreign office and the admiralty say the decision whether to disarn the three Russian cruisers at Manila or effect repairs there and endeavor to reach a Russian port was left in Admiral Enquist's hands to determine according to his best judgment. Little doubt was felt that the cruisers would be interned until the end of the war as, before the repairs which Enquist cables are imperative could be effected, a Japanese squadron would be off Coregidor Island, waiting to capture or sink them. The admirally has given out a cabled statement of the dead and wounded on board the three cruisers at Manila, but asserts that no report from Rear-Admiral Nebogntoff has yet been received. ST. Trepoff Dictator.

Emperor Nicholas ukase virtually creating Governor-General Trepoff dictafor, has caused a mighty sensation. It is the imperial decognition of the crisis in the internal affairs of Russia. The figure of Constan Pobledonostseff, chief procurator of the Holy Synod, looms large. He lef what many believed to be his dying bed last Thursday and went to Tcarkoe Selo, where he spent almost the entire day with His Majesty. The ukase came like a bolt from a clear sky. M. Bosuligun, Minister of the Interior, immediately resigned and it is not improbable that other ministers will follow suit. It is rumored in the city that Count Lamsdorff, the Foreign Minister, has already placed his resignation in the bands of the Emperor and that he will be succeeded by M. Muravieff, former Minister of Justice and now unbassador at Rome. Admiral Alexieff has also demanded the acceptance of his resignation.

M. Sturmer, an extreme reactionary, who belongs to the Yon Plehve school, it is commonly reported, will succeed M. Bouligin as minister of the interior.

In spite of the popular interpretation, however, that Trepoff's appointment means repression and reaction to the bitter end, the latter conclusion by no means follows, as it was under Toris-Melikoff's distatorship that the ereform programme of Alexander II. was worked out. The same thing may prove true in this case. Among the contradictionary rumors, which are current here, one is that the issue of the ukase will be coupled with the immediate calling of a Zemsky Sober. The decision of the Emperor undoubtedly was precipitated by the Russian disaster in the Sea of Japan, and threatened peace demonstrations, the first of which was to be a big meeting of Zemstyoists and Dumalsits at Moscow to-day, which General Trepoff, in his first act, probibited. Council Adopts Ordinance to Keep Him On the Force.

#### TO STOP THE STREET CARS

Ordinance Offered for Creating Position of City Paymaster.

The Common Council last night after fighting over the Mayor's veto of the Mills ordinance for over an hour settled down to routine work and disposed of a vast amount, of it.

The resolution providing for the laying of a ten-inch pipe line from the Gas Works to the proposed new gas holder was recommitted on motion of Mrt Morton, who said it might develop in the proposed investigation into gas conditions here that new works might be needed and a 20-inch pipe would be required. The ordinance increasing the police force to one hundred and two men, so as to retain Sergeant Jones A. Otey on the force, was adopted as was that increasing the pay of the men in the Street Department 10 cents per day.

The body concurred in the ordinance from the Board requiring street cars to stop on signal for passengers at intersecting streets.

Mr. Grigg offered a resolution to inquire into the cost and advisability of establishing at least three play-grounds for children in the city.

Mr. Garber opposed the suggestions of Mr. Morton, and read letters of experts favoring the ten-inch main for the proposed new holder. He said to change the plans now would mean that the holder could not be completed for use by next winter, and this would be a serious matter, as the city might be thrown in darkness.

Mr. Grimes supported Mr. Morton's motion, and said he could see no reason why the Council should employ an expert to come here to find out what is the matter with Richmond gas, and not wait until the expert had made his report.

Sunday evening, at the close of the service, after the congregation was dismissed. Mr. Webb continued to try the capabilities of the new instrument, chiefy for the benefit of Mr. Cosby, a fellow organist. In the meantime the light in the auditorium were extinguished, and those who remained were in a subdued light. Mr. Webb grew enthusiastic as he proceeded, and first one and then another of the old masters contributed to the experimental recital. SCHOOL COMMITTEE.

Gentlemen of State Board Investigating Eggleston Charges.

The committee of the State Board of Education, appointed at the recent meeting here in connection with the Eggleston charges to ascertain whether or not additional testimony could be secured, met lest night at the Department of Public Instruction, and while the members of the board declined to discuss the matter in detail, it was admitted that the full board will be called to meet here assoon after June 15th as possible. The indefiniteness of the date is due to the fact that one or more of the members are engaged with commoncements at institutions they represent, and it cannot be stated positively whether they can be here on the 10th. It is hoped that the board will be able to get together on that date.

This action of the board means that the subcommittee, consisting of Attorney-General Anderson, Dr. Lyon G. Tyler and Mr. John T. West, have discovered additional evidence of sufficient importance and gravity to warrant calling the full board together with the less practicable delay, Just what that evidence is or what it consists of no one who knows will state. It is known, however, that the board earefully went over the testimony at the recent hearing, and that it examined books and papers relating to the charges made by Mr. Eggleston and the evidence already had. The new testimony, it is believed, consists chiefly of books and papers and other documentary material which, it is expected, with throw light upon the question of the publication of the Virginia School Register and its ownvestigating Eggleston Charges.
